REPRESENTING UTILITY & EXCAVATION CONTRACTORS
NORTH FLORIDA

Presidents Message

August Flow Presidents Letter

Dear Friends and NUCA Members

We find ourselves in the dog days of summer. I hope everyone is staying cool and keeping hydrated. These are the days we really set ourselves apart as an industry as we are able to overcome the heat and extreme weather yet still continue to provide services to keep the utilities running and our communities growing. I always say our workers show their true grit during these months in the south and really earn my respect for what they do day in and day out.

July was a full month for our organization as well. We began with our Scholarship Night and State of the Union event at St. Johns Golf and Country Club on July 10th. At the meeting we recognized the outstanding achievements of two of our members' children who will be pursuing further education in college and we were able to assist in that effort by awarding them with the NUCA of NF scholarship. We also heard from representatives of Clay County and St Johns County regarding the anticipated growth and types of work that will be coming out to support the growth in their communities. The JEA representative had a last minute emergency and could not attend, but we will be rescheduling their presentation for a meeting in the near future. Many of our members headed down to Ocean Reef in Key Largo in the middle of the month for the NUCA of FL State Conference. There were many good presentations and lots of opportunities to socialize with other NUCA members from across the state.

This month will be the annual NUCA NF fishing tournament on August 16 at the NE Florida Marlin Association. If you have not already registered, it is not too late. Also please remember to purchase your raffle tickets. The next young professionals networking event will be held on September 10th at Fore Score Golf Tavern, please see the newsletter for more information. Please remember to extend an invitation to any of your younger employees to attend so that we can start to develop the next generation of Utility Contractors in NE Florida.

Thank you to all the members, without you this organization would not exist. I invite you all to please join us at our events. These provide a great opportunity to interact with our fellow utility workers, share our common stories, concerns and lessons learned, often over a cocktail or your favorite adult beverage. It is this interaction with each other that strengthens our organization and makes the utility industry better for everyone. Hope to see you all at the next meeting.

Respectfully,

Paul Gilsdorf

The Law and Your Business

The Law and Your Business- Unlicensed Contracting Tony Zebouni, Lindell & Zebouni, PA

In December 2020, homeowner hired a business (“ULC”) to build a single-family home on their property in Fernandina Beach, Florida. The business owner was a certified general contractor, obtained a building permit under his own name and supervised the project. Before construction was complete, however, the contract was terminated. The business entity filed suit to collect monies owed due to the termination.

The Court held that the parties' contract was unenforceable by ULC because it, a limited liability company, was an unlicensed contractor, even though the owner was licensed because its owner and who *performed as its qualifying agent but failed to apply for registration or certification on behalf of the business, as required by section 489.119(2), Florida Statutes*. ULC also argued it should still recover under the contract for work that did not require a license.

In Florida, all “contractors” must be certified or registered with the DBPR. § 489.115(1), Fla. Stat. (2020). When any business organization other than a sole proprietorship intends to engage in construction contracting, the applicant *must apply for registration or certification as the qualifying agent of the business organization. To qualify a business organization contractor for the first time, the agent must apply to the Construction Industry Licensing Board and submit certain documents and a fee. If the Board determines the business is qualified, the Department will issue the business organization a certificate or registration.*

Under Florida law, only a licensed contractor can enforce its contracts. “As a matter of public policy, contracts entered into by an unlicensed contractor shall be unenforceable in law or in equity by the unlicensed contractor. To be considered licensed, a business organization contractor must have a qualifying agent that is itself licensed to perform the work contemplated in the contract. A business organization is unlicensed if the business organization does not have a primary or secondary qualifying agent in accordance with this part concerning the scope of the work to be performed under the contract. Whether a business organization is a licensed contractor within the meaning of section 489.128 turns on whether the business organization is legally associated with a person licensed for the type of work to be performed under the contract as of the effective date of the contract.

The contract was entered into by ULC when its owner was a certified general contractor who could have served as qualifying agent but that doesn’t satisfy the statutory requirements to be licensed. The ULC owner could have signed the contract on his own behalf with no mention of the entity, but he would lose certain protections that inure to corporations or LLCs.

The ULC owner could not become ULC's qualifying agent until he applied with the Board and was issued a certificate or registration by the Department. Initial issuance' means the first time a certificate or registration is granted to a business organization, including the first time *an individual becomes a qualifying agent for that business organization and the first time a business organization is qualified by that individual.*” *As an unlicensed contractor, ULC could not enforce the contract. If a contract is rendered unenforceable under this section, no lien or bond claim shall exist in favor of the unlicensed contractor for any labor, services, or materials provided under the contract or any amendment thereto.*

ULC was an unlicensed contractor that could not enforce the parties' contract. Because ULC was never qualified as a business organization contractor by the DBPR, because a qualifying agent never applied with the DBPR on behalf of ULC the business was unlicensed when it executed the contract it could not enforce the contract.

Industry News and Advocacy

UCA Workforce Development Wins In One Big Beautiful Bill!

NUCA celebrated a major workforce development policy victory in the newly signed “One Big Beautiful Bill Act” (OBBB, H.R. 1), capping off years of advocacy for increased educational and training opportunities for the American utility construction industry and those seeking a fulfilling career within it.

“The Workforce Pell Grant program created under the One Big Beautiful Bill Act is a transformative win for America’s utility construction workforce,” remarked Zack Perconti, NUCA’s Vice President of Government Affairs. This workforce development program for the American utility construction industry was a top advocacy goal sought by NUCA’s Washington Summit attendees. Our Summit work over the past three years paid off!

The new law signed on July 4 expands federal Pell Grant eligibility by establishing the Workforce Pell Grant program, allowing students without a higher education degree or not already enrolled in a program to receive Pell Grants for attending career and technical education (CTE) programs that provide between 150 to 600 clock hours of instructional time over 8 to 15 weeks.

Beneficial Business Tax Reforms Signed Into Law

The OBBB also included several business tax provisions supported by NUCA that will directly benefit utility contractors. The bill permanently extends the Section 199A deduction for S corporations, ensuring long-term certainty for businesses, while preserving the 37% top tax rate. Additional welcome reforms include restoring the R&D tax credit and full expensing, relaxing the interest expense limitation, and implementing other pro-growth measures designed by Congress and the Administration to strengthen American businesses and stimulate economic expansion.

USDOL Reduces Small Business Penalties

The U.S. Department of Labor announced July 14 it has revised OSHA’s Field Operations Manual to reduce penalties for small businesses to encourage prompt hazard abatement. The updated policy expands penalty reductions, increasing the 70% reduction from businesses with 10 or fewer employees to those with up to 25 employees. It also introduces a 15% penalty reduction for employers who quickly address hazards. Additionally, businesses with no history of serious, willful, repeat, or failure-to-abate OSHA violations qualify for further reductions. OSHA stated that these changes aim to help small businesses allocate resources instead toward compliance and safety. The new policies take effect immediately, but penalties issued before July 14, 2025, follow the previous structure.

Association News

Join NUCA for Half the Price Now Through August 31!

Know someone in the industry who hasn't joined NUCA yet? Now's the perfect time! From now until August 31, new members can join NUCA at a special mid-year rate, at just half the cost of a full-year membership.

NUCA National and NUCA Chapter membership comes with big benefits:

- Access to top-notch NUCA education, training, and certification programs
- Powerful national advocacy on industry issues
- A listing in our exclusive member directory
- Cost-saving business programs, including healthcare and 401(k) options
- Local networking opportunities—and much more!

Have questions or want to refer a colleague? Contact NUCA's Lauren Roget at lauren@nuca.com or 703-358-9300 to get started today!

Your Completed Trench Safety Stand Down Reports Are Requested

The ninth annual Trench Safety Stand Down (TSSD) held last month delivered to excavation industry employees what NUCA sought: an increased attention to safety around jobsite trenches and excavations. The 2025 TSSD saw strong participation from NUCA member companies nationwide, with 20,235 participants recorded to date. But we need every NUCA member who held an event to let us know how many of your employees benefitted from this training. Please send NUCA your completed TSSD reports by August 15 (and your event photos, too)! Helmet stickers are already being distributed—but only if we have your reports! The TSSD online Participation Form can be found at nuca.com/tssd.

Calling All Expert Equipment Operators To The Utility Expo

Have you heard? NUCA is bringing the National Equipment Operators Championships to The Utility Expo in Louisville, Kentucky, October 7-9, 2025. Test your skills on excavators and backhoes while completing corn hole, soccer, and golf challenges! Stay tuned for more details on how to sign up to compete. With more than 21,000 attendees and 1.5 million square feet of products and services, The Utility Expo 2025 is once again the #1 trade show for utility construction professionals. NUCA will be in booth EH2113. All operators competing in the National Equipment Operators Championship must register for The Utility Expo. Use promo code NUCA to save 20% on your registration. Go to www.theutilityexpo.com/attend-the-show/registration-and-pricing.

Expanded NUCA Advantage Member Benefits Program

Your NUCA membership investment can deliver benefits far in excess of its cost -- but only if you ask your human resources office to explore what it offers. NUCA Advantage's online portal leads to expanded health care benefits options for your company, as well as payroll, wellness, compliance, benefits administration, 401K programs, online training, OSHA logs and a wealth of free HR benefits available only to NUCA members. Find our expanded NUCA Advantage benefits program at www.NUCAAdvantage.com.

Why NUCA Members Should Rethink Their 401(k) Strategy

Managing a 401(k) plan often creates more work than it should especially for NUCA members already stretched thin. That's why NUCA has now partnered with Voya, AMP Administrator, and Greenline Wealth Management to create the Voyager 401(k) Pooled Employer Plan (PEP), built specifically for utility contractors and their employees.

Voyager simplifies plan administration by pooling multiple NUCA companies into a single structure unlocking access to economies of scale and service. Voya's platform provides investment tools and financial wellness resources to help workers stay on track for retirement. Greenline also conducts a no-cost benchmarking review for NUCA members to identify savings and help reduce fiduciary liability through full outsourcing. Whether you're offering a plan today or considering one for the first time, Voyager offers a compliant, cost-effective solution designed around your construction business. Schedule your free plan review today by calling 561-405-6609 (option 7), or email info@greenlinewm.com.

SAFETY NEWS

By Jeff Blomgren
Chair, NUCA Safety Director's Forum

Back to School Safety

It's hard to believe that summer is over for kids returning to school. Some safety reminders for the kids going back to school and for us, as motorists, might be a good idea. More than 100 school children are injured each year in accidents that occur inside school zones. From 2013 to 2022 over 1,000 people died in school transportation related crashes. 38% of these fatalities were pedestrian. These statistics highlight the need for increased awareness among all road users.

Students

If you have a child going to school for the first time, be sure they know their phone number and address and how to get hold of another trusted adult. It's also helpful for them to know how to contact emergency services (911).

Teach them not to talk to strangers or accept rides from someone they do not know.

Teach them to use sidewalks and stop and look right and left before crossing the road.

Cross streets at the corner, stay in the crosswalk and obey traffic signals.

If your student rides the school bus, get to the bus stop early and stay away from the curb.

Board only the designated school bus and never an alternate one.

If your child is driving, make sure they buckle up and never use their cell phone while driving.

If you get your student a cell phone, download emergency apps and real time weather alerts.

Drivers

Be aware of school zones. Obey speed restrictions in school zones. Flashing yellow school bus lights are an indication that a stop is coming up. Do not try to pass before the stop is made and never pass when red lights are flashing. Do not proceed until all the children have reached safety.

Our children are our future, and they depend on us and need our protection to be sure they are safe from hazards that are under our control. Drive safely.

Surety Bonds 101: What Contractors Need to Know About P&P Bonds

For contractors, **performance and payment (P&P) bonds** aren't just another box to check — they're an essential part of risk management and business growth.

These bonds protect everyone involved on a project:

- ✓ **Project owners** know the work will get done.
- ✓ **Suppliers and subcontractors** know they'll get paid.

But many contractors don't realize just how much P&P bonds impact their reputation, insurance costs, and ability to win future work.

🔍 **What these bonds do:**

- **Performance bond:** If the contractor can't finish the job, the surety either steps in to complete it or compensates the project owner.
- **Payment bond:** Guarantees that all subs, suppliers, and laborers get paid, helping prevent liens and disputes that could delay or derail the project.

📋 **Why bonding history matters:**

- A poor bonding track record can **limit your ability to bid** on larger public and private projects that require these bonds.
- Building and maintaining a **strong bonding history** can open doors to higher-value contracts and long-term partnerships.

Bottom line: Performance and payment bonds aren't just a cost of doing business — they're a tool that protects your projects *and* supports your company's growth.

YOUR TURNKEY EROSION CONTROL COMPANY

Seed and Mulch Services:

- No Industrial Fertilizers
- The Nitrates from our Composted Topsoil provides up to 20% better germination rate
- Composted topsoil is not only nutrients for seed but also acts as a dust inhibitor.

Sodding:

- Affiliated with multiple growers to provide quality sod.
- Sod harvested and installed, usually within 24 hours
- Standard varieties include Bahia and Floratam; many ornamental sod varieties are available upon request

Silt Fence:

- We follow all FDOT material specifications
- Majority of silt fence is plowed in, resulting in a faster and more accurate installation process
- Flexible in developing containments and controlling water flows on project sites
- Multiple fencing types available such as C-Pop, Tree Saver, and Wire Back

Staked Turbidity:

- Follow all FDOT Section 104 requirements & material specifications
- Provides an impermeable erosion control barrier
- Designed and installed for controlling storm water runoff

**AT GREENSEED, WE BELIEVE
GROWING A BRIGHTER AND
MORE SUSTAINABLE FUTURE
STARTS FROM THE GROUND UP.**

Floating Turbidity:

- Follow all FDOT Section 104 requirements & material specifications
- We install Class I, Class II and Class III barriers
- Installed in a manner to minimize or eliminate the degradation of associated bodies of water.

Pond Liners & Cut Off Walls:

- Protects ponds from erosion and sediment & provides stabilization of deep excavations
- Prevents incursion from outside water sources
- Provides fish and plant friendly environments
- Minimizes lowering ground water levels

Grading:

- Our experienced operators are equipped to successfully manage a wide range of projects—from jobsite repairs to residential land improvements.
- Lot Grading
- Washout repairs
- Driveway Improvements

Maintenance:

- Maintenance contracts available with exclusive offers
- Including maintaining SWPP
- Entry way sweeping, maintenance and turning rock
- Mowing & stump grinding

Who We Are

PKX provides a range of excavation services, leveraging advanced equipment and experienced personnel to handle diverse projects efficiently. Our capabilities include excavation for municipal, commercial, and industrial purposes with the use of hydro and pneumatic excavation, pipeline and sewer jetting, and camera inspection. With a focus on safety and environmental responsibility, PKX delivers comprehensive excavation solutions that prioritize accuracy, efficiency, and reliability.

Why Choose Us

Industry Experience

- Extensive background in excavation services spanning residential, commercial, and industrial sectors.
- Proven track record of successfully completing diverse projects of varying complexities.

Trained Operators

- Highly skilled and experienced personnel with specialized training in excavation techniques.
- Continuously updated on industry best practices and safety protocols.

Safety

- Prioritization of safety as a core value in all operations and project execution.
- Implementation of rigorous safety measures to minimize risks and hazards on-site.

We have locations in Jacksonville, FL, Savannah, GA, Cincinnati, OH, Columbus, OH, and Charleston, WV.
