NORTH FLORIDA

Presidents Message

June Flow Presidents Letter

Dear NUCA Members and Friends,

May reflected some of the challenges that may lie ahead. Having a handful of members not renewed this year reinforces for me the importance of remaining resilient and steadfast in our work. We all feel a sense of responsibility towards one another, and this year will test our faithfulness. Stay patient and hopeful for brighter days ahead.

The Next Man Up training was a great success, as always. Thank you to AJ Johns for hosting and to Chad Cockrell for leading the charge. On Friday, JEA held its Standards Informational Meeting, where a major topic of discussion was the No Tolerance policy regarding any cracks in sanitary manholes. Many voices were heard, and JEA is now aware of our position. We will continue working with them toward a fair and practical outcome.

Be watchful, for better days are ahead.

As always, please know that if there is anything NUCA of North Florida can do to support you or your company, do not hesitate to reach out.

Best Wishes

Alvaro A Rios

The Law and Your Business

The Law and Your Business - Escrow Agents Tony Zebouni, Lindell & Zebouni, P.A.

The Law and Your Business- Fraudulent Bond or Lien Claim Anthony Zebouni, Lindell & Zebouni, P.A.

GT was the general contractor for a project to improve the Riviera Beach Water Treatment Plant, and as required by law, obtained a bond from Surety Arch Insurance to secure payments for the project. GT subcontracted with Brown Electrical Solutions, LLC, ("Brown") for Brown to install certain electrical fixtures in the contract. The subcontract with Brown was for about \$99,000. K&M was a "materialman" to a subcontractor. K&M provided electrical materials to the subcontractor, Brown, for use in the project. At Brown's request, K&M provided Brown with well over \$100,000 in materials that Brown claimed were for use in the project. After Brown failed to pay, K&M made a claim on the bond for about \$123,000 -- all the materials that Brown claimed ordered for the project, plus some legal fees and other charges.

The claim was contested because (1) the notice contained legal fees and other charges that are specifically not allowed to be claimed; (2) the claim was significantly higher than Brown's total subcontract on the project of about \$99,000; and (3) the claim contained items that were not covered by the subcontract or otherwise fell outside its scope, such as a claim for wire in a length that greatly exceeded the amount allowed under Brown's subcontract. Brown was able to verify about \$56,000 of the materials claimed on the bond were in fact delivered to the job site and thus actually incorporated into the project.

In order for one who has furnished materials to have a lien, the materials must either be "specially fabricated" or actually incorporated into the improvement. Here, the materials K&M furnished were not specially fabricated, so K&M could recover on the bond only for qualifying materials "actually incorporated" into the project. "A person who serves a fraudulent notice of nonpayment forfeits his or her rights under the bond," and "the service of a fraudulent notice of nonpayment is a complete defense to the claimant's claim against the bond." It does not necessarily extinguish the debt.

A notice of nonpayment is fraudulent if the claimant has willfully exaggerated the amount unpaid, willfully included a claim for work not performed or materials not furnished for the subject improvement, or prepared the notice with such willful and gross negligence as to amount to a willful exaggeration. § 255.05(2)(a)2F.S. says a claim is fraudulent if the claimant does any one of three things: (1) willfully exaggerated the amount unpaid, (2) willfully included a claim for work not performed or materials not furnished for the subject improvement, or (3) prepared the notice with such willful and gross negligence as to amount to a willful exaggeration.

Multiple errors existed in the notice -- claiming (1) disallowable expenses, (2) items not within the subcontract's scope, and (3) a sum with more than 100% discrepancy. That discrepancy was not a "minor mistake." It was gross negligence.

The takeaway is that by including unauthorized items, one exposes themselves to the risk of a fraudulent notice of nonpayment defense. K&M's bond claim contained more unauthorized items than authorized ones. The court found that K&M had "prepared the notice with such willful and gross negligence as to amount to a willful exaggeration".

In filing a claim of lien or claim against a bond, you must exercise due diligence to protect your legal rights.

K & M ELECTRIC SUPPLY, INC v BROWN ELECTRICAL SOLUTIONS, LLC

Industry News and Advocacy

Update on the 2026 Surface Transportation Bill

The House Transportation and Infrastructure Committee has not held a markup on its portion of the surface transportation reauthorization bill, marking the latest delay in its long-anticipated reauthorization. Committee Chair Rep. Sam Graves (R-MO) indicated the House panel is now aiming to consider the legislation later this month, possibly even the week of May 18. However, the text of the bill has not yet been released and negotiations remain ongoing.

Lawmakers face a Sept. 30 deadline to reauthorize expiring surface programs. With repeated delays and the House schedule many observers now expect Congress will pass this fall a short-term extension of current authorities to avoid disruption. A key sticking point continues to be the legislation's top-line funding level. Graves has expressed interest in a range of \$500 billion to \$550 billion, while Ranking Member Rick Larsen (D-WA) is pushing for a higher number. Bipartisan discussions between the two leaders are continuing as they work to bridge the gap.

For our industry, these developments underscore the need for sustained advocacy to ensure a robust, long-term reauthorization that delivers certainty for highway, bridge, and transit projects.

NUCA Opposes Gas Tax Holiday Proposal

NUCA and our transportation coalition partners are strongly opposed to proposals under discussion by the Trump Administration and Congress to suspend the federal gas tax. Such plans would have limited, if any, impact on consumer prices, and risk driving up costs on projects designed to improve every community across the country.

"The federal gas tax is the foundation of the Highway Trust Fund (HTF), which supports the nation's transportation improvements," wrote NUCA and TCC in a letter sent to all members of Congress. "Using it as a political tool is a disservice to those who depend on reliable, well-maintained road, bridge and transit systems." NUCA and the TCC encourage Congress to focus on legislation that will address affordability: timely passage of a surface transportation reauthorization bill.

Tariff Refund Portal Website Open

U.S. Customs and Border Protection (CPB) said U.S. businesses that paid tariffs that the Supreme Court recently ruled were illegal could start applying for refunds on April 20. CBP launched the Consolidated Administration and Processing of Entries (CAPE) portal through their Automated Commercial Environment (ACE) system. Companies applying for the refund must submit what's known as a "CAPE declaration" (Consolidated Administration and Processing of Entries), which CBP says will streamline the "submission and processing of valid refund requests for duties imposed" under the Trump Administration.

The system requires importers and authorized brokers to file claims for duties paid that should see them being refunded within 60-90 days of their application. 330,000 importers paid estimated duties of about \$166 billion on approximately 53 million items as of March 4, according to the CBP. But as of April 9 only about 56,500 of these importers owed refunds had completed enrollment for electronic payment.

Your NUCA membership delivers business benefits that will help your bottom line. Are you or your employees taking advantage of them?

Safety & Damage Prevention Conference: Registration Now Open, Sept. 15-18

Don't miss your chance to join the industry's top safety professionals at the NUCA Safety & Damage Prevention Conference, September 15-18, 2026, at the iconic Brown Hotel in Louisville, Kentucky.

Immerse yourself in three powerful days of timely discussions designed to tackle the real challenges facing utility construction today. The agenda features critical sessions on transportation accidents, risk management, mental health in the workplace, the latest OSHA updates, emergency preparedness, rethinking trench safety (presented with NUCA National Partner United Rentals), a compelling panel on drugs in the industry, and a fresh 811 update.

This year's conference shines a spotlight on the most pressing safety and damage prevention issues impacting our industry. You'll gain actionable insights, practical strategies, and fresh ideas to strengthen safety practices and reduce incidents back at your company. Connect and recharge during two dynamic networking events, including the prestigious STAR Award presentation. Whether you're looking to stay ahead of regulations, protect your team, or drive real improvement in damage prevention, this is the must-attend event of the year. Register today at nuca.com/safety-damage-prevention-conference/ and secure your spot in Louisville!

NUCA Assurance: Get more control over your business insurance program

Join like-minded NUCA contractors who have taken control of their claims, managed their risk, and secured better, more focused insurance services for their businesses. NUCA Assurance is a construction-focused group captive owned by NUCA members and designed by insurance experts to deliver the claims control and risk-management support smart construction business owners need. This cost-effective association benefit helps your company purchase workers' compensation, general liability, and auto liability insurance. Find out how to get more control over your utility construction company's insurance needs by starting at NUCAAssurance.com.

NUCA Benefits: The expanded NUCA Advantage member benefits program

Your NUCA membership investment can deliver benefits far in excess of its cost -- but only if you ask your human resources office to explore what it offers. Start by forwarding this document to them and ask them to check out *NUCA Advantage*. *Our online portal leads to expanded health care benefits options for your company, as well as payroll, wellness, compliance, benefits administration, 401K programs, online training, OSHA logs and a wealth of free HR benefits available only to NUCA members. Find our expanded NUCA Advantage benefits program at www.NUCAAdvantage.com.*

NUCA Benefits: Why NUCA Members Should Rethink Their 401(k) Strategy

Managing a 401(k) plan often creates more work than it should especially for NUCA members already stretched thin. That's why NUCA has now partnered with Voya, AMP Administrator, and Greenline Wealth Management to create the Voyager 401(k) Pooled Employer Plan (PEP), built specifically for utility contractors and their employees.

Voyager simplifies plan administration by pooling multiple NUCA companies into a single structure unlocking access to economies of scale and service. Greenline also conducts a no-cost benchmarking review for NUCA members to identify savings and help reduce fiduciary liability through full outsourcing. Whether you're offering a plan today or considering one for the first time, Voyager offers a compliant, cost-effective solution designed around your construction business. Schedule your free plan review today by calling 561-405-6609 (option 7), or email info@greenlinewm.com.

SAFETY NEWS

By Khalifa Barr, Chair, NUCA Safety Directors Forum.

As Chair, I wish to take a moment to commend the exceptional effort and engagement demonstrated during the recent Trench Safety Stand Down. The dialogues, observations, and active participation across our teams reflect a profound commitment to safeguarding one another and underscoring the paramount importance of trench and excavation safety on every project.

As we reflect on the outcomes of the stand-down, I encourage everyone to continue posing critical questions: Are we diligently identifying hazards before work begins? Are our protective systems being meticulously inspected and utilized correctly? Are we effectively communicating when site conditions evolve? These discussions are essential to ensure that every employee returns home safely at the end of the day.

As we transition into the month of June and commemorate Safety Month, let us continue to build on this momentum by remaining vigilant, adhering to established protocols, and holding one another accountable on every job site. Safety is not merely a policy or obligation — it constitutes a collective responsibility and a core value that relies on each of us staying engaged and proactive.

Let us not forget that our line of work carries significant hazards, and it is imperative that we prioritize each other's safety to ensure that everyone returns home at day's end. We must avoid pursuing personal agendas at the expense of safety; it must remain our foremost priority.

Thank you for your unwavering dedication, professionalism, and commitment to sustaining a safe work environment for all.

Equipment Fire Prevention During This Drought

High temperatures, dry conditions, and heavy equipment use during summer months increase the risk of equipment fires for underground utility contractors. Even small fires can lead to major property damage, project delays, and costly insurance claims.

Why It Matters

- Heat increases the likelihood of engine and hydraulic failures
- Dry debris buildup can ignite quickly
- Equipment fires often result in significant downtime and repair costs

Common Fire Risks

- Hydraulic fluid or fuel leaks
- Overheated engines or exhaust systems
- Electrical shorts or damaged wiring
- Debris buildup around engine compartments

Best Practices to Reduce Risk

- Perform daily equipment inspections
- Clean debris from engines and moving parts
- Repair leaks immediately
- Keep fire extinguishers accessible and inspected
- Train operators on emergency shutdown procedures

Proactive maintenance and fire prevention practices help reduce equipment losses, improve jobsite safety, and demonstrate strong risk management to insurance carriers.
