

General Information

Name and address of high school: Mandarin High School, 4831 Greenland RD., Jacksonville, FL
32258

Year of High School graduation: 2023

Name and address of college: University of North Florida, 1 UNF Dr., Jacksonville, FL 32224

Anticipated Graduation Year: 2027 Major: Nursing

Academic Information

College GPA: 4.00

List SAT and/or ACT College Board Examination Scores: (Scores not appearing in your official transcripts may be submitted if attested by a high school official.)

1. 1320
2. 1270
3. 1240

Describe any extraordinary responsibilities you have at home or any information you think may be relevant for the judges to see. Tidying up the household.

ESSAY

500 words or less

(Essay must be printed or typed. Provide as an attachment)

How does the construction industry positively impact your day-to-day life?

OPTIONAL

Provide as an attachment any other information you would like to share (i.e. Academic honors, Extra-Curricular activities, community service, work experience etc.)

AUTHORIZATION

Should you be selected to receive the NUCANF Scholarship, we would like your permission to include portions of your application and your essay in our scholarship book which is available for members to review, and in various association communications and publications. Your signature below will indicate your approval.

Signature of Applicant

Please email your completed application along with pertinent information no later than May 15, 2024 to:

nucanf@gmail.com

You will receive an email within a day or two confirming that I have received your application. Please contact me at (904) 612-8692 with questions.

NUCANF Scholarship

Brick by brick: How construction shapes daily living

Now riddled with skyscrapers and intricate structures, we often take such complexity for granted in our society. Long ago, what we perceived as a primitive shack was a haven for individuals who needed shelter. But we did not settle for a shack; we wanted more, so we traversed the road that led to the emergence of a critical industry that serves as the heartbeat of society today - the construction industry. Responsible for the creation of all buildings today, the construction industry is one of the unsung heroes that positively permeates my daily life. Aspects that comprise part of the quality of my life cultivated by the construction industry are shelter/housing and infrastructure development.

When I leave my bed any morning and head towards a room to do something I want, a critical thought regarding the construction industry isn't immediately apparent. Only by digging deeper and considering the construction industry do I arrive at a revelation: the collaborative effort of the engineers, architects, and construction workers towards every bit, or most, of the room I'm in right now was to create a secure space for me and many others. The steps for a blueprint to lead to the creation of a full-scale shelter only serve to solidify my appreciation for the construction field. Without a shelter, there is no protection from the elements of weather, no safe space where I could relax and unwind after a taxing day, and no presence of sufficient hygiene. I've always loved the saying, "Your house is your castle," as my castle would represent me; however, no castle would be built without construction.

Of course, knowing myself, I can't ensure a superb quality of life without venturing out with the promise of a productive day ahead occasionally. So, with car keys in hand, I boot the car up and go somewhere. That place is usually the university I attend. Whenever I drive, I always go down I-95 and can't help but notice it's just too convenient. What made this drive from point A to point B so organized was the infrastructure of the road. Enabling prompt travel between my home and school and having the process be incredibly organized simultaneously is a concept to marvel at. But the infrastructure doesn't stop at roads; when I arrive at school, the bustling buildings with classes, shops, and restaurants just around the corner that surge energy are all made possible by infrastructure backed by the construction industry.

As of now, when I pass any building, there lies a world of possibility behind everything put in place to make said building. Each brick, pole, blueprint, rod, or material doesn't just create a structure - it creates dreams. What one does at each place creates moments worth taking one more step. So, the next time you stroll past a building, take a moment to soak in the tireless effort that makes these dreams possible.

April 20, 2024

To whom it may concern:

It is my pleasure to write this letter of recommendation for _____ has been a student in my Basic Principles of Human Nutrition (HUN2201) course this Spring term, 2024. This is an asynchronous distance learning class which means that for most students there is very little interaction with the instructor, except through video and written assignments.

I had my first glimpse into _____ interests when grading the first week's video assignment called, "Introduce Yourself." _____ spoke about _____ and _____ passion for a career in nursing. _____ also expressed _____ passion for reading.

I was impressed that _____ was always proactive in reaching out to me with a question or concern. This nutrition class is set up so that a student's lowest grade on the Discussion Board assignments is dropped. A student can also choose to not complete one of the Discussion Board assignments. _____ proactively reached out to me in early February to let me know that _____ would not be completing an upcoming assignment. _____ also communicated with me that _____ would let me know if any circumstance prevented _____ from completing a future assignment. I appreciated _____ proactive approach. _____ never needed to reach out to me again, and _____ completed all remaining assignments on time. There was another time later in the term when the assignment instructions were somewhat vague. Instead of assuming, _____ once again reached out to me to clarify and make sure that what _____ intended to write about was acceptable. It sure was.

Academically, _____ completed all assignments on time and achieved excellent grades both on _____ written essay discussion assignments and on _____ more objective quizzes. For discussion assignments, _____ wrote very thorough and grammatically correct posts that provided insight into _____ ability to critically think through topics addressed in the assignment. For the major assignment on micronutrients, students analyze their diet and evaluate their diet in relation to three chosen micronutrients. _____ wrote an insightful essay on what _____ learned from the analysis and how _____ intended to improve _____ diet.

In summary, through my email and Zoom connections with _____, as well as through _____ written discussion board assignments and essays, I am confident to highly recommend _____ for this scholarship.

Sincerely,

Eileen Myers, MPH, RDN, LDN, CEDS-C, FAND
Adjunct Instructor, University of North Florida
